

1. Take a screenshot of your code

```
@PostMapping("/deleteInactive")
public void deleteInactiveCustomers() {
    deleteInactiveCustomersApi.deleteInactiveCustomersApi();
}
```

Keyboard Shortcuts

Windows

Windows
Key +
Shift + S

Mac

Cmd +
Shift +
Ctrl + 4

2. Draw a box around the method that you are using

```
@PostMapping("/deleteInactive")
public void deleteInactiveCustomers() {
    deleteInactiveCustomersApi.deleteInactiveCustomersApi();
}
```

3. Connect the box to the method

```
@PostMapping("/deleteInactive")
public void deleteInactiveCustomers() {
    deleteInactiveCustomersApi.deleteInactiveCustomersApi();
}
```

```
public void deleteInactiveCustomersApi() {
    DeleteInactiveCustomers deleteInactiveCustomers = new DeleteInactiveCustomers();
    deleteInactiveCustomers.findAndDeleteInactiveCustomers( daysInactive: 100);
}
```
